**2025 REPORT FROM THE EYE UNIT DURING THE 4-DAYS MEDICAL OUTREACH AT IKPEREJERE  
COMMUNITY LED BY DR. NWOBODO O.S.**

The medical outreach program which ran for four consecutive days at the Umehie town hall (**17th December - 20th December 2025**) had a total number of 391 patients attended to at the eye units.

With the services of three eye doctors (**Optometrists**) namely:

Dr. Emmanuel Eje

Dr. William Ikechukwu

Dr. Nwobodo Samuel

**NUMBER OF PATIENTS SEEN PER DAY PER DOCTOR.**

| <b>Doctor</b> | <b>Day 1</b> | <b>Day 2</b> | <b>Day 3</b> | <b>Day 4</b> | <b>Total</b> |
|---------------|--------------|--------------|--------------|--------------|--------------|
| Dr. Emmanuel  | 30           | 25           | 27           | 18           | <b>100</b>   |
| Dr. William   | 36           | 25           | 20           | 10           | <b>91</b>    |
| Dr. Nwobodo   | 47           | 55           | 47           | 51           | <b>200</b>   |
| <b>Total</b>  | <b>113</b>   | <b>105</b>   | <b>94</b>    | <b>79</b>    | <b>391</b>   |

**DIAGNOSED CONDITIONS**

During the outreach, we picked up interest in identifying individuals suffering from Cataract, Glaucoma, Presbyopia as well as other eye conditions such as Dry eyes disease, Allergic conjunctivitis, Pterygium, Presbyopia and other minor ocular conditions.

**[info@joyfulhealthfoundation.org](mailto:info@joyfulhealthfoundation.org) | [www.joyfulhealthfoundation.org](http://www.joyfulhealthfoundation.org)**

At the end of the outreach, it was found out that of the 391 patients who were attended to in the eye units, 73 had Cataract in one or both eyes, 32 had Glaucoma in one or both eyes, 16 had both cataract and glaucoma in either eyes or both, 270 had other conditions such as dry eyes, pterygium, allergic conjunctivitis etc. while 243 individuals had presbyopia.

It's is worthy to note that some patients were diagnosed of glaucoma/cataract/Presbyopia alongside other minor conditions such as dry eyes, allergic conjunctivitis and pterygium making the prevalence of those minor conditions much higher.

| Eye conditions      | No. Diagnosed | Percentage |
|---------------------|---------------|------------|
| Cataract            | 73            | 18.7%      |
| Glaucoma            | 32            | 8.2%       |
| Cataract + Glaucoma | 16            | 4.1%       |
| Presbyopia          | 243           | 62.2%      |
| Others              | 270           | 69%        |

### **UTILIZATION OF MATERIALS (GLASSES)**

We had a total of 1000 pairs of reading glasses at the beginning, the table below shows the different lens powers, numbers used and remaining ones.

| <b>Lens Prescription</b> | <b>No. Obtained</b> | <b>No. Dispensed</b> | <b>No. Remaining</b> |
|--------------------------|---------------------|----------------------|----------------------|
| +1.00                    | 100                 | 2                    | 98                   |
| +1.25                    | 85                  | 8                    | 77                   |
| +1.50                    | 100                 | 26                   | 74                   |
| +1.75                    | 85                  | 14                   | 71                   |
| +2.00                    | 100                 | 27                   | 73                   |
| +2.25                    | 85                  | 12                   | 73                   |
| +2.50                    | 100                 | 28                   | 72                   |
| +2.75                    | 85                  | 20                   | 65                   |
| +3.00                    | 100                 | 19                   | 81                   |
| +3.50                    | 80                  | 53                   | 27                   |
| +4.00                    | 80                  | 34                   | 46                   |
| <b>TOTAL</b>             | <b>1000</b>         | <b>243</b>           | <b>757</b>           |

## **OBSERVATIONS.**

1. Most of the inhabitants suffer from dry eyes, allergies and pterygium.
2. Most of the elderly patients (40yrs and above) are hyperopic and will require more than just reading glasses.
3. Younger patients who have refractive errors (mostly myopia) could not benefit much from the program as there was no provision for special glasses.
4. Glaucoma was not as common as expected
5. Cataract patients were mildly common and was found mostly among individuals aged 55yrs and above.

**[info@joyfulhealthfoundation.org](mailto:info@joyfulhealthfoundation.org) | [www.joyfulhealthfoundation.org](http://www.joyfulhealthfoundation.org)**

## **RECOMMENDATIONS**

1. More ocular lubricants (i.e. Hypromellose), antiallergic drops and steroidal drops should be made available next times
2. Provisions for special glasses for some indigent persons who needs more that reading glasses
3. Provisions for poor school children who couldn't afford medical care to get prescription glasses.
4. Less of Glaucoma drugs should be purchased
5. Provision for cataract surgery for indigent persons

## **CONCLUSION**

This year's outreach was a huge success and the approach adopted for operational logistics was instrumental in enhancing transparency, smooth service delivery, over burdening of the workers and most importantly reduced wastage of resources.

The hospitality received during the 4days was top notch and the villagers were very happy to have been helped once more this year.

Hopefully, next year will be greater.

**DR. NWOBODO O.S.**
